Settings that we recommend you change/revisit right away include:

1. *Site Title & Tag Line* (**Settings | General**) - should conform with your Name and Branding
2. *Time Zone/Date Format & Site Language* (**Settings | General**)
3. *Permalink Structure* (**Settings | Permalinks**) - set this at least to "Post Name"
4. *Comments* (**Settings | Discussion**) - leave defaults, but also consider making people register to comment
5. *Default Image Size* (**Settings | Media**) - depending on how your theme is laid out
6. *Default Category* (**Posts | Categories**) - change this to something you will use a lot (pages by default have no categories or tags; you will need a plugin for this)
7. *Theme* (**Appearance | Themes**) - revisit and install a different theme to change the look of your site
8. *Menu* (**Appearance | Menu**) - start building your navigation
